

Memo to All Departments

May 21, 2012

Please accept this friendly reminder that approximately two years ago we sent out a memo to all Calvary Chapel Costa Mesa Departments and Ministries detailing the Calvary Chapel Costa Mesa policy for developing and hosting of websites. The policy approved by Pastor Chuck and the board is this;

- a. all Calvary Chapel Costa Mesa owned and operated ministries must NOT contract with outside sources for development of new websites.
- b. all ministries must contact Calvary Technical Services (CTS) for development of a new website
- c. all hosting of any website that is a ministry of Calvary Chapel of Costa Mesa must be hosted by Calvary Chapel Technical Services (CTS)
- d. all registration of domain names or new domain names must be accomplished through CTS

Recently, it has come to our attention that a few ministries have not abided by this policy for one reason or another. Pastor Chuck, on May 19th affirmed this policy with the following message he asked us to relay to all departments and ministries:

"No one is authorized to order web site development outside of our own department. If they do so, they are personally responsible to pay to have it done. It doesn't make sense to have a division in our own organization capable of doing this work, then to hire outside sources. This is our policy..."

Please contact Calvary Technical Services for all of your web hosting, development or technical issues as we are here to serve you as a ministry of the church. Calvary Chapel Costa Mesa spends graciously to meet technology needs and provides all ministries with the opportunity for website design, hosting of websites, live streaming, email and technology support. If you have questions, concerns or needs please contact us at your convenience. Contact information is listed below.

Note: We will not link to any independently created websites from any CCCM owned website to avoid liability for security or privacy issues with sites not administrated by CTS

Thank you,

Jim Shirley  
Department Manager of CTS
